45-, 60- & 90-MINUTE FIRE RATED FRAMES

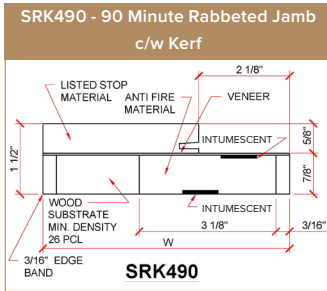

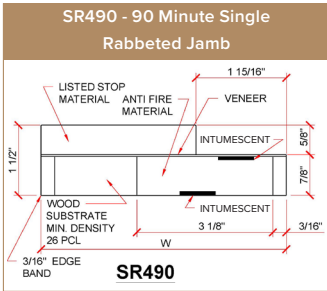

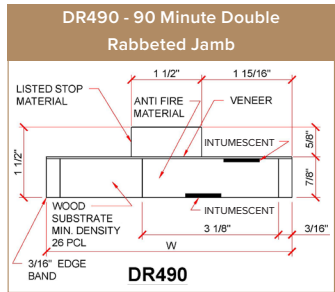

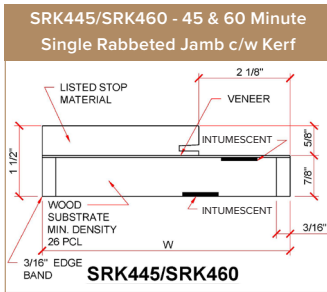

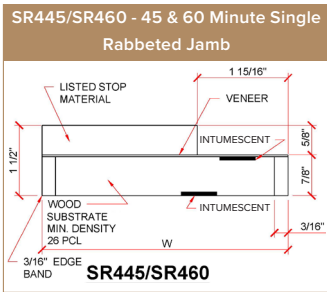

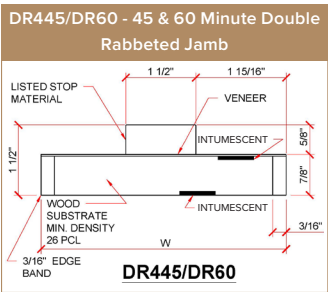

Fire Rated door frames are available with 45-, 60- or 90-minute label to maintain the synergy of the project without compromising design.

- Fire rated door frames are manufactured with an unlimited assortment of hardwood and softwood veneers, as well as high pressure laminates to match the doors & millwork.
- The frames' unique design allows them to achieve fire ratings with both neutral and positive pressure testing.
- Our patented frame design incorporates intumescent material into the frame itself, eliminating the need for it to be built into the doors.
